

LANDMARK SCHOOL

One-to-One Everyday

► Landmark School

Since 1971 Landmark School has served students with dyslexia and other language-based learning disabilities. Our students have average to above-average intelligence, are curious, and are eager to learn but have been misunderstood and underserved by their prior schools. Landmark offers both summer and academic year programs.

► What Works

The cornerstone of our program and what differentiates us from others is a daily, one-to-one tutorial along with class sizes of 4-8 students, specially trained faculty, and a variety of proven methods used to individualize each student's experience. We do not follow a single teaching methodology, such as Orton-Gillingham, Wilson, or LiPS, but instead draw on these—and many more—to meet the individual needs of each student.

► Meeting Our Students Where They Are

Landmark offers three distinct programs for our students: Expressive Language, Founders, and Prep Program that serve the needs of our 475 students and meet them where they are as learners. We teach strong study skills across all subject areas so students are empowered to meet academic challenges with competence and confidence.

► Living and Learning

Landmark's Residential Life Program has its own curriculum that emphasizes responsibility, respect, and independence. Residential Life's structured system gives students the opportunity to develop skills, such as time management, organizational development, and peer mediation. Robust athletics, visual and performing arts, community service, and much more offer Landmark's students a well-rounded and enriching school experience.

► Where We Are

With a campus in Prides Crossing, Mass., for our 310 High School students and one for our 160 Elementary•Middle School students in Manchester, Mass., Landmark offers a unique and personalized learning environment for students in grades 2-12, just 30 miles north of Boston.

► Our Impact

With 15%-20% of the population struggling with some form of language-based learning disability, we aim to reach a broad audience beyond our campuses. The Landmark School Outreach Program provides professional development programs for educators through school consultation partnerships, online courses, summer seminars, publications, and much more.
